JOB TITLE: **MECHANICAL WORKSHOP TECHNICIAN**

IMMEDIATE SUPERVISOR: **MECHANICAL ENGINEERING MANAGER**

Reporting to the Mechanical Engineering Manager, the Mechanical Workshop Technician will assist in the manufacture of products at various stages throughout projects and provide mechanical engineering support to other departments within the company. Based in our offices in Carrickfergus, the Mechanical Workshop Technician will be part of the mechanical engineering team.

Responsibilities:

- The use of workshop machines and tools including lathe and vertical mill
- Mechanical assembly of Yelo products
- Maintain build quality and report any issues to immediate supervisor
- Use bench fitting techniques as required
- Support the operation of CNC machines as needed
- Ensure conformance with ISO9001 procedures
- Carry out any other task that may be required from time to time

Essential Requirements:

- 2-3 years' experience in a similar role
- Experience in the use of workshop machines and tools including lathe and vertical mill
- Ability to understand and interpret mechanical drawings
- Ability to construct assemblies from drawings
- Experience with building small assemblies

Preferred Requirements:

- CNC experience
- Valid forklift operator license

Skills:

- Good analytical and problem solving abilities
- Have good manual dexterity
- Ability to meet deadlines and work in a fast paced environment
- Be self-motivated, be able to manage time and set priorities
- Excellent communications skills
- Work well under pressure
- Team player
- Ability to adapt to changing requirements

Salary:

£19,000 – 21,000 per annum, depending on experience
